presents **el milagro de lo que es**

The Music that IS is embraced and created in the moment, through the free perception of all that IS in that moment. The Music that IS is free from any category or style and its expression has no rules, preconditions, expectations or purposes. It is not born from a pre-determined form, it simply reveals itself through the awareness of a free listening and a free creation.

This recording was born in the spontaneity of the moment. No decision was made in advance, but what wanted to be manifested in the moment was simply embraced and realised.
